## SUMMARY

---

Computer Science student graduating December 2026 with industry experience in software engineering, cloud infrastructure, and DevOps, complemented by published deep learning research in computer vision. Experienced building enterprise .NET applications, CI/CD pipelines, and machine learning systems.

## PROFESSIONAL EXPERIENCE

---

### BT Group

05/2026 – 08/2026

*DevOps and Full Stack Software Engineering Intern*

- Developed internal .NET web applications and SQL Server-backed dashboards for monitoring machine learning models and workflows.
- Optimized GitHub Actions CI/CD pipelines, reducing deployment time by approximately 35%

## EDUCATION

---

### King Fahd University of Petroleum and Minerals

08/2022 – 12/2026

*B.S. in Computer Science*

- Concentration on Artificial Intelligence and Cloud Infrastructure
- GPA: 3.63/4

## RESEARCH EXPERIENCE

---

### Undergraduate Research Assistant

01/2025 – 12/2025

*Joint Research Center of Artificial Intelligence (SDAIA & KFUPM)*

- Collaborated with a research team to develop and evaluate transformer-based deep learning models for underwater image enhancement
- First author of "Underwater Image Enhancement Using a U-Shape Transformer with Diffusion-Based Perceptual Loss" published in the university's journal

## PROJECTS

---

### Design and Implementation of a Real-Time Digital Twin for Mechanical System Health Monitoring and Fault Prediction

*Senior Project*

- A real time digital twin for mechanical systems, enabling predictive fault detection and performance monitoring
- Working on data pipelines and machine learning-based anomaly detection for early failure prediction in order to perform predictive maintenance
- Integrating sensors, embedded systems, and software dashboards for real time system synchronization and analytics

### Enjazi

*Web Engineering and Design*

- Lead a team of 5 to build a website using MERN stack to increase productivity among students and employees by enhancing regular todo lists into a more engaging entity
- Developed features to integrate regular tasks and help handle computing resources more effectively

## AWARDS & PROGRAMS

---

Second place at the Computing Projects Expo 2025

Second Honor Student

KAUST Academy AI Program

## SKILLS

---

Programming: Python, Java, JavaScript, C#

ML: PyTorch, TensorFlow, OpenCV, scikit-learn

Frameworks: React, .NET MVC, Node.js

Cloud: AWS, Google Cloud, Docker, Kubernetes, Terraform
