SUMMARY

Computer Science student graduating December 2026 with industry experience in software engineering, cloud infrastructure, and DevOps, complemented by published deep learning research in computer vision. Experienced building enterprise .NET applications, CI/CD pipelines, and machine learning systems.

PROFESSIONAL EXPERIENCE

Boston Consulting Group (BCG X)

01/2027 – 04/2027

Incoming Visiting Forward Deployed AI Engineer

Dubai, UAE

- Partner with BCG X case teams to design, build, and deploy AI/ML solutions directly within client environments
- Bridge technical execution and client-facing strategy, translating business problems into AI-driven solutions and enabling non-technical case teams and client stakeholders to adopt them

BT Group

05/2026 – 08/2026

DevOps and Full Stack Software Engineering Intern

Jeddah, Saudi Arabia

- Developed internal .NET web applications and SQL Server-backed dashboards for monitoring machine learning models and workflows.
- Optimized GitHub Actions CI/CD pipelines, reducing deployment time by approximately 25%

EDUCATION

King Fahd University of Petroleum and Minerals

08/2022 – 12/2026

B.S. in Computer Science

Dhahran, Saudi Arabia

- Concentration on Artificial Intelligence and Cloud App Engineering
- GPA: 3.63/4

PROJECTS & RESEARCH

Design and Implementation of a Real-Time Digital Twin for Mechanical System Health Monitoring and Fault Prediction

01/2026 – 12/2026

Senior Project

- A real time digital twin for mechanical systems, enabling predictive fault detection and performance monitoring
- Working on data pipelines and machine learning-based anomaly detection for early failure prediction in order to perform predictive maintenance
- Integrating sensors, embedded systems, and software dashboards for real time system synchronization and analytics

Undergraduate Research Assistant

01/2025 – 12/2025

SDAIA & KFUPM Joint Research Center of Artificial Intelligence

- Collaborated with a research team to develop and evaluate transformer-based deep learning models for underwater image enhancement
- First author, "Underwater Image Enhancement Using a U-Shape Transformer with Diffusion-Based Perceptual Loss"

AWARDS & PROGRAMS

Second place at the Computing Projects Expo 2025

Second Honor Student

KAUST Academy AI Program

Jeel Younafis Fellow 2026

SKILLS

Programming: Python, Java, JavaScript, C#, Dart

ML: PyTorch, TensorFlow, OpenCV, scikit-learn

Frameworks: MERN, .NET MVC Core, Flutter

Cloud: AWS, Google Cloud, Docker, Kubernetes, Terraform
